INTRODUCTION

MCGP is a comprehensive tokenization platform that focuses on the digital transformation of real-world assets, companies, and businesses. At the core of the platform is the TSA Connect application, enabling the buying and selling of products and services using the MCGP token. Key offerings include cross-border payment solutions for seamless transactions in USDT and local fiat currencies through registered merchants. MCGP ensures secure user interactions with its KYC verification process and provides digital/cryptocurrency exchange services. The platform also supports a decentralized wallet for trading assets on decentralized exchanges. Additionally, MCGP offers engaging gaming experiences, tokenization services for sectors like real estate, agriculture, and business, as well as utility bill payments and the staking and mining of digital assets.

Mission STATEMENT

We aim to become the world-leading Tokenization platform, our goal is to revolutionize the way assets are bought, sold, and traded. By providing a secure and transparent platform for tokenizing various assets such as real estate, agricultural products, securities, company/local businesses and other real world assets. MCGP is bridging the gap between traditional finance and the digital economy. Through our innovative technology and commitment to compliance, we are empowering investors to diversify their portfolios and access new investment opportunities in a seamless and efficient manner.

Proposed OBJECTIVES

The MCGP tokenization platform aims to streamline financial operations by tokenizing traditional assets(real world assets), companies /business thereby enhancing liquidity, and simplifying asset management.

Fractional Ownership

One of our primary objectives is to enable fractional ownership, thus expanding accessibility to diverse asset, company and business classes and enhancing transparency. By leveraging on-chain data, we aim to create a unified, verifiable source of truth across each asset's lifecycle, allowing for greater accountability and trust in asset management.

Smart Contract Automation

For financial assets such as bonds, loans, and private equity, our tokenization platform leverages smart contract automation to streamline operational processes, significantly reducing manual intervention and associated costs. This automation also supports secondary trading, enabling broader accessibility and participation from a diverse global investor base.

Security and Compliance

The MCGP tokenization platform is designed to enhance security and ensure regulatory compliance by embedding regulatory requirements directly within the token structure. This approach fosters a secure, efficient, and transparent environment for investment, aligning with industry standards and supporting trust across all transactions.

MCGP ECOSYSTEM

01

Tokenization

Our ecosystem enables the tokenization of diverse real-world assets, including agricultural commodities, securities, and entire businesses, making traditionally illiquid assets more accessible, tradable, and efficient.

02

Products & Services Marketplace

Our platform supports buying and selling a wide array of products and services. This includes categories such as fashion (clothing, shoes, accessories), electronics, food and catering, hotel services, and personal services like hairstyling and baking, etc. This marketplace aims to create a versatile hub for consumers and businesses alike, promoting accessibility and variety within a secure, digital environment.

03

Exchanges & Payment Services

MCGP supports both centralized and decentralized exchanges (CEX and DEX), facilitating trades and payments in various cryptocurrencies (e.g., USDT) and fiat currency. Payments can be processed through registered merchant partners, creating a seamless bridge between digital assets and traditional currencies.

04

Gaming & Metaverse, NFT & AI Marketplace

We offer a comprehensive marketplace for play-to-earn and spin-to-earn games, as well as metaverse experiences. This includes NFT assets, gaming items, and AI-driven products, enhancing digital ownership and interactivity in virtual spaces.

ABOUT US

MCGP is an all-in-one tokenization platform designed to help businesses, companies, and asset owners manage and exchange value digitally without the need for coding. The platform is user-friendly, making it accessible to small business owners, entrepreneurs, and individuals who wish to tokenize tangible or intangible assets with ease.

MCGP offers a secure, transparent, and efficient solution for owning, managing, and transferring assets, bridging the gap between traditional finance and the digital asset ecosystem. This opens up new opportunities for investors, businesses, and asset owners alike. With MCGP, tokenizing assets no longer requires any technical or blockchain knowledge. Our ecosystem is designed to simplify the process, allowing users to create tokens and tokenize businesses, agricultural products, and real-world assets in just a few clicks without a single line of coding.

Beyond tokenization, MCGP's ecosystem offers additional solutions, including exchange and payment services, a marketplace for products and services, utility bills, staking and mining options, and a specialized Gaming, Metaverse, AI, and NFT marketplace. This pitch deck provides an overview of MCGP's ecosystem and solutions, positioning it to lead in a rapidly growing tokenization industry, projected by BlackRock's CEO to reach a \$16 trillion market valuation by 2030.

MCGP TOKENOMICS

\$MCGP tokenomics and distribution: The \$MCGP token is designed to provide utility, governance, and incentives within the ecosystem. The token distribution includes allocations for the team, advisors, ecosystem growth, marketing, staking rewards, and liquidity. This ensures liquidity for trading while incentivizing participation. \$MCGP holders will also have governance rights to influence key decisions, supporting the long-term growth and success of the platform.

Total Supply: 200,000,000 MCGP

Market TRENDS

MCGP's tokenization platform is strategically positioned within a rapidly evolving market that reflects several key trends shaping the future of digital finance and asset management. The asset tokenization space is expanding, driven by the increasing desire for fractional ownership and liquidity in traditionally illiquid asset classes such as real estate, private equity, and commodities. This is complemented by the growing demand for integrated exchange and payment services that bridge fiat and cryptocurrencies, facilitating easier access to digital assets for both retail and institutional investors.

In parallel, decentralized marketplaces are gaining traction as consumers and businesses look for more transparent, efficient, and secure alternatives to traditional e-commerce, powered by blockchain. Additionally, the adoption of eco-friendly staking models, spurred by Proof of Stake (PoS) protocols, is creating new opportunities for passive income generation, aligning with investor interest in sustainable solutions.

The gaming, metaverse, and NFT sectors are also undergoing rapid expansion, driven by new digital economies that enable virtual asset ownership, play-to-earn models, and digital collectibles. Finally, the integration of AI with NFTs is introducing innovative approaches to content creation, where AI-driven, tokenized digital assets are becoming increasingly sought after by both investors and creators. These trends align with MCGP's diversified ecosystem, positioning the platform at the forefront of a transforming digital asset landscape.

MARKET OPPORTUNITY

MCGP's market opportunity is anchored in the rising demand for decentralized digital asset solutions that span diverse sectors. As the global tokenization market is forecasted to reach \$16 trillion by 2030, MCGP is positioned to capitalize on this trend by making assets like real estate and private equity more accessible and liquid. Additionally, as adoption of crypto-fiat exchanges, blockchain-based marketplaces, staking, and NFTs accelerates, MCGP's integrated ecosystem—including gaming, metaverse, and AI-driven marketplaces—aligns closely with the needs of both retail and institutional investors, offering streamlined, secure, and transparent digital asset management across industries.

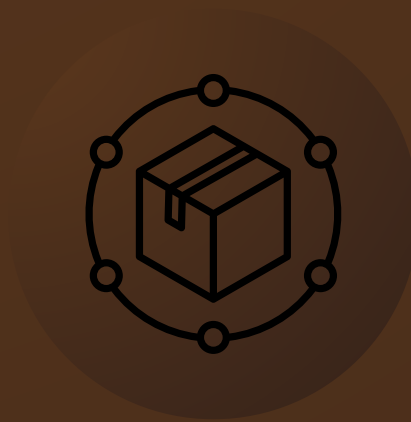

Proposed SOLUTIONS

MCGP's proposed solution is an integrated, user-friendly platform that simplifies the tokenization of real and digital assets, making them more accessible and liquid. It enables users to tokenize a wide range of assets, such as real estate and commodities, without requiring technical expertise. The platform combines centralized and decentralized exchange services, a digital marketplace, and staking and mining solutions, catering to both retail and institutional users. Additionally, it supports the rapidly growing sectors of gaming, the metaverse, and NFTs, integrating AI-driven digital assets for innovative content creation. MCGP provides a secure, scalable, and efficient framework for engaging with the digital economy.

Financial PROJECTIONS

MCGP's financial projection is strong, leveraging the growing demand for digital asset solutions. With the global tokenization market projected to reach \$16 trillion by 2030, the platform is positioned to capture significant market share across key sectors. Revenue will be generated from transaction fees, staking rewards, trading fees, and platform usage. The gaming, NFT, and metaverse sectors further offer monetization opportunities through asset sales and partnerships. As adoption of blockchain technology accelerates, MCGP's diversified offerings in asset tokenization, exchange services, and AI-driven NFTs position it for robust financial growth.

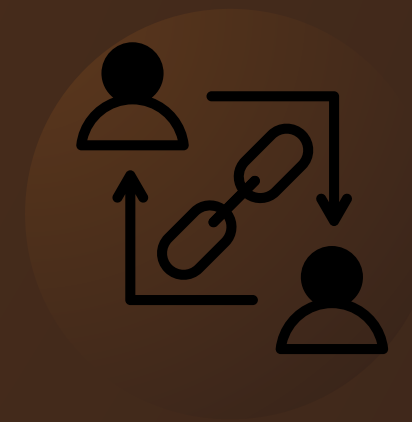

FUTURE WORK

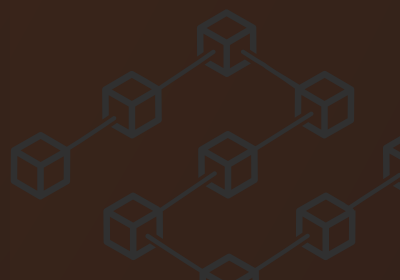

Building of MCGP Network-Chain,
Decentralized & Centralized
Exchange

Establishing of Decentralized P2P,
NFT & AI Marketplace.

Expansion of MCGP Tokenization platform
to support Child's Education (Tokenization
of child's education)
